

As Tekirdağ Un-Multirex, in line with the vision of "To expand the market in which it operates by offering quality and natural products that contribute to the health of consumers and to be the undisputed leader of this market", in order to fully meet the needs and expectations of customers and consumers; It is the quality policy of Tekirdağ Un-Multirex Branch to comply with the quality management conditions, to continuously improve the quality management conditions, to be a trusted brand by producing quality, safe and legal products.

To this end ;

With the participation of all employees, the implementation of the quality management system and continuous improvement of product variety, safety and quality are ensured.

Competent personnel are employed, training needs are determined and training opportunities are provided.

Continuous improvement of the performance and skills of our employees is ensured, and all units contribute to the development of food safety culture.

Efforts are made to use our resources efficiently and to increase our business performance.

In order to ensure the safe operation of production lines, preventive maintenance principles are followed and production equipment is continuously improved.

Data are evaluated effectively to prevent errors and losses, and measures are taken to work in accordance with standards. Efforts are made to reduce production losses.

It is tried to reduce product costs by acting with the principle of zero error.

By keeping the motivation of the personnel high, the awareness of responsibility and ownership towards the products produced is increased. Effective participation of the staff is ensured with their ideas and suggestions.

Works are carried out according to processes, procedures and instructions and it is ensured that they are constantly up-to-date.

Potential nonconformities and risks are determined in advance and preventive actions are implemented.

Studies are carried out on the causes of nonconformities and measures are taken to eliminate them and prevent their recurrence.

In order to ensure product safety, GMP, HACCP and quality expectations are complied with.

Efforts are made to provide an environment-friendly, safe and healthy work environment.

Employees are informed in order to save money in the use of resources such as energy, fuel, water, packaging materials and raw materials.

All employees are trained to raise awareness in order to protect our environment, prevent pollution, reduce waste and use resources correctly.

Risk analyzes are made to identify potential causes of accidents and efforts are made to eliminate risks by taking appropriate measures.

Appropriate equipment and hardware are used to provide a healthy and safe work environment for our employees, and trainings are provided to ensure that our employees are aware of this issue.

All employees at Tekirdağ Un-Multirex work in cooperation to achieve these goals.
